

# PICK & PLACE ROBOTS

Ideal for small components high-speed pick & place work.  
Positioning is made by servo control, so no complex mechanical  
adjustments are needed.

# Full lineup of 6 models in all from 2 axes to 4 axes

**2 axes type**

P.453

YP220BX/YP320X

**3 axes type**

P.455

YP220BXR/YP320XR/YP330X

**4 axes type**

P.458

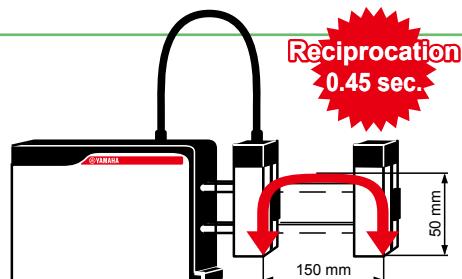

YP340X

Model	Axis	Structure				Maximum payload (kg)	Cycle time (sec.)	Page
		X-axis	Y-axis	Z-axis	R-axis			
YP220BX	2 axes	Belt	-	Belt	-	3	0.45	P.453
YP320X		Ball screw	-	Belt	-	3	0.57	P.454
YP220BXR	3 axes	Belt	-	Belt	Rotation axis	1	0.62	P.455
YP320XR		Ball screw	-	Belt	Rotation axis	1	0.67	P.456
YP330X	4 axes	Ball screw	Ball screw	Belt	-	3	0.57	P.457
YP340X		Ball screw	Ball screw	Belt	Rotation axis	1	0.67	P.458

## POINT 1

### High speed

Super high-speed pick & place operation with a standard cycle time of 0.45 sec. (YP220BX with up/down 50 mm, back/forth 150 mm, arch amount 50, load 1 kg) greatly contributes to improvement of the productivity. Since it is possible to output a signal to turn on/off any external equipment from any position while the axis is moving, the actual production cycle time is further improved.

## POINT 2

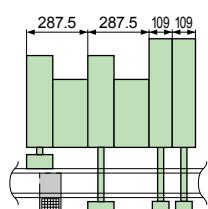

### Compact

Use of a compact size with an overall width of 109 mm (YP220BX) makes it possible to make the production line compact and simple. The moving arm structure with less interference with surroundings contributes to space saving.

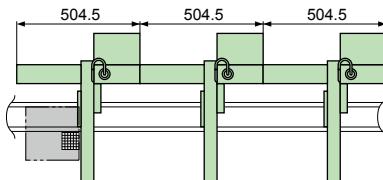

Reference examples of robot layout comparisons

The compactness can be checked by comparing the occupied spaces when the YP-X series and YAMAHA's Cartesian/SCARA robots are laid out.

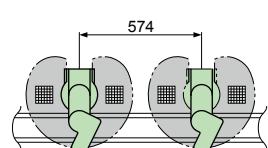

■ Line using pick & place utilizing space saving

■ Line using YAMAHA's compact Cartesian robot PXYx  
X-axis stroke: 250 mm  
Y-axis stroke: 250 mm

■ Line using YAMAHA's compact SCARA robot YK250X

## POINT 3

### High accuracy

Both extremely high-speed performance and high repeated positioning accuracy of +/- 0.02 mm (YP320X, YP320XR, YP330X, YP340X) are assured.

## POINT 4

### Complete absolute position system

As the complete absolute position system is used, no return-to-origin operation is needed.

## POINT 5

### Versatility

Use of YAMAHA's unique servo system makes it possible to freely program the stop point and operation pattern settings. This robot is applicable to production of many models in small quantities that cannot be supported by the cam type robot.

Specify various controller setting items. RCX222 ▶ P.558

## ■ Specifications

	X axis	Z axis
AC servo motor output (W)	200	200
Repeatability <sup>Note 1</sup> (mm)	+/-0.05	+/-0.05
Drive system	Timing belt	Timing belt
Deceleration ratio (mm)	Equivalent to lead 24	Equivalent to lead 20
Maximum speed <sup>Note 2</sup> (mm/sec)	1440	1200
Moving range (mm)	200	100
Cycle time (sec)	0.45 <sup>Note 3</sup>	
Maximum payload (kg)	3	
Robot cable length (m)	Standard: 3.5 Option: 5,10	
Weight (kg)	17	

Note 1. Positioning repeatability precision in a single swing when residual vibration is stabilized (variable depending on the load and stroke).

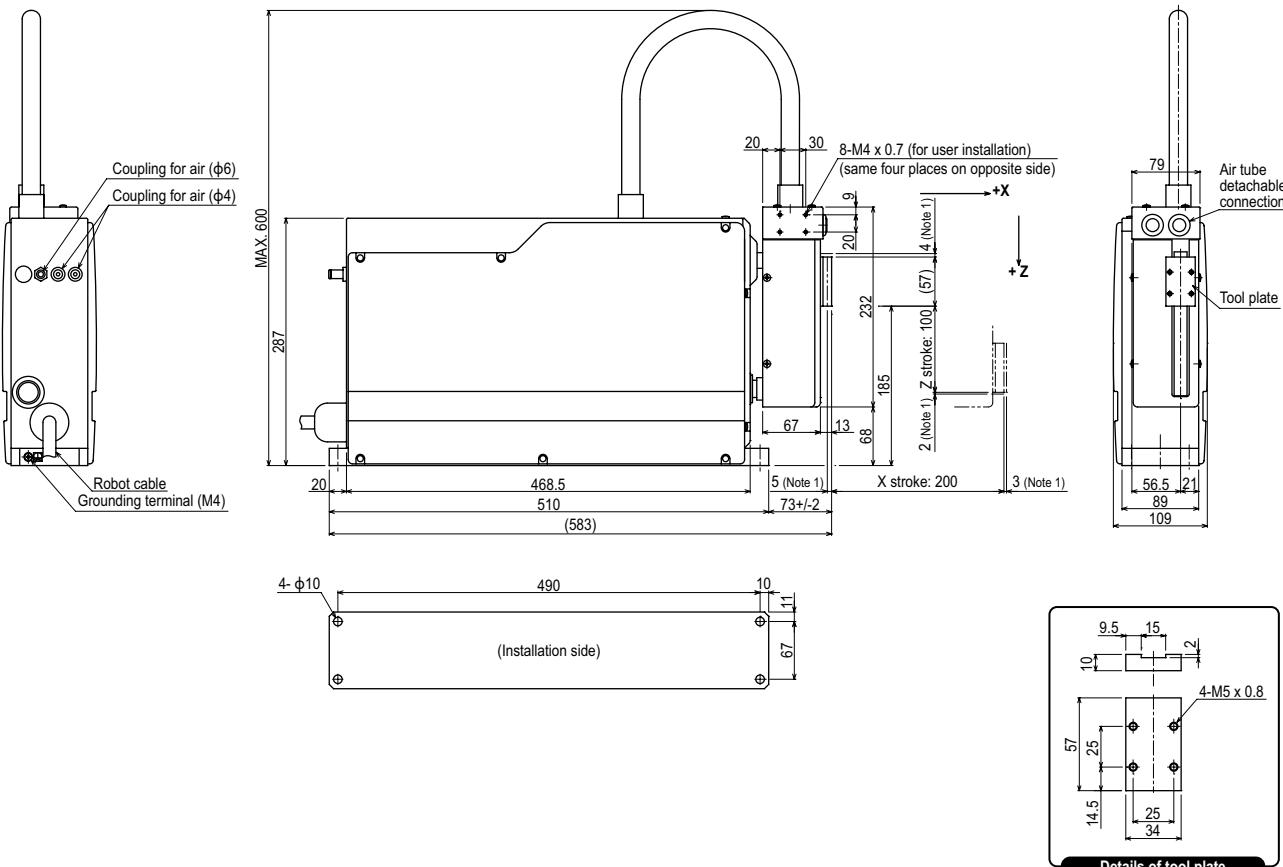

Note 2. When the moving stroke is short, the maximum speed may not be reached.

Note 3. Reciprocating time in vertical direction (50mm) and longitudinal direction (150mm) with the arch amount of 50 (when executing rough-positioning arch motion with 1kg load).

## ■ Controller

Controller	Power consumption (VA)	Operating method
RCX320 RCX222	500	Programming / I/O point trace / Remote command / Operation using RS-232C communication

## YP220BX

Note 1. Distance to mechanical stopper.

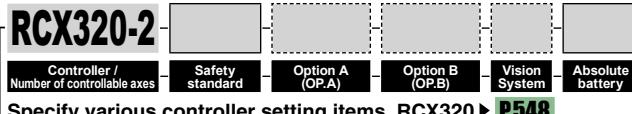

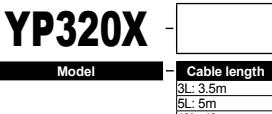

Note 2. Return-to-origin on the YP220BX is by absolute reset. So the origin position must be set the first time (making initial settings) but after that is not required.
